

User Story:

As a bus passenger, I should be able to log my presence on the bus.

Acceptance Test:

- The user should be logged in to log the presence.
- The passenger count should be adjusted accordingly.
- Bus occupancy information should be correctly stored in RateIT's database.

User Story:

As a bus passenger, I should be able to rate the bus infrastructure so that I can provide feedback to the operators.

Acceptance Test:

- A user should be logged in to complete the survey.
- A user should receive a confirmation message after rating the infrastructure.
- A user should not be able to submit the survey without completing all the questions.
- The correct questions should be displayed.
- A bus operator should be able to access the feedback provided by the user.

User Story:

As a bus passenger, I should be able to rate the bus driver so I can report the driver's performance to the bus operators.

Acceptance Test:

- A user should be logged in to complete the survey.
- A user should receive a confirmation message after rating the driver.
- A user should not be able to submit the survey without completing all the questions.
- The correct questions should be displayed.
